

Equalizer

The Equalizer is made to optimize your power consumption. It prevents the main fuse from tripping and enables you to utilize all available power for EV charging when possible. It is easily connected to the HAN-port on your smart meter and with a one-click setup it communicates with your charging robot(s), via EaseeLink™ over radio or Wi-Fi.

Why choose Equalizer?

Smart power management

Benefits

- Automatic load balancing between the charging robot(s) and the building.
- Avoid overload and power interruption while charging your EV.
- Charge your EV's faster when the general consumption in the building is low.*
- Plug & Play - one-click setup.*
- Communication over EaseeLink™ directly with your chargers or by WiFi.*
- Monitor the power consumption in your building through the Easee app.
- No external power needed.
- Up to 50m coverage in open air.*
- For a list of supported meters, go to <http://easee.support>.

*When used together with an Easee Charging Robot.

Why choose Equalizer?

Charge when there is available power

The Equalizer makes sure that the charging of your EV's is done at the most convenient time, when the demand for other loads is low. When you have paired your Equalizer to the system, it will automatically start to balance the available power in the building based on its readings and optimize your charging experience.

The EaseeLink™ will ensure that the automatic load balancing will continue to work even if the connection with the cloud is interrupted or should there be a problem with your WiFi.

Monitoring

While the main purpose of the Equalizer is to optimize the charging experience, it also provides the opportunity to monitor your daily power consumption through the Easee App.

With a full overview of your home's consumption, you have the power literally in your hands to save energy and hence the environment.

Specifications

Measurement
in mm

Technical

General

Product (mm): H: 110 x W: 110 x D: 27.5
Packaging (mm): H: 130 x W: 130 x D: 39
Weight: 110 g
Material: PC/ABS
Colour: White
IP degree: IP40
Voltage: 12-32 Vdc 30mA
RJ11 connector

Installation

Cable length: 1.5 m
RJ11 to R45 custom made cable
Extended with a RJ45 adapter (up to 200 m)
Integrated magnets for attaching the product to metal surfaces or to wall mount plate

Connectivity

EaseeLink™ RF and WiFi*
HAN connection to energy meter
Monitor power consumption with the EeSee app
RFID / NFC reader

*WiFi is required for normal operation. When offline, it will continue to work via EaseeLink™ RF.

Sensors and indicators

Status LED
Touch button

The product contains

Equalizer

Cable

Wall mount plate
